

DATA SHEET

Asbestos packing with PTFE

Braided asbestos yarns impregnated with PTFE dispersion, treated with pure mineral oil. It is a flexible, resilient, homogeneous and compact packing. It can be utilized on stainless steel or chromed shafts in the presence of high peripheral speeds without etching them. It is suitable for alkalis, thinned inorganic acids, water, steam, organic gases, solutions of every kind. It can be utilized in paper mills, dyeing plant, foodstuff, pharmaceutical and oenologic industries.

Spec: 3.0mm - 50mm

Braided asbestos (round) square packing,
Texturized glass fiber round (square)
packing, Ceramic fiber round (square)
packing are available
